

SUMMER SCHOOL

MASS SPECTROMETRY IN BIOTECHNOLOGY AND MEDICINE IV

Centre for Advanced
Academic Studies

Dubrovnik, Croatia

4-10 July 2010

www.msbm.org

Dear Colleagues,

We will host the 4th Mass Spectrometry in Biotechnology and Medicine (MSBM) Summer School in Dubrovnik, Croatia 4-10 July 2010. MSBM is intended to educate students, post-doctoral fellows and anyone interested in learning about applications and fundamentals of mass spectrometry in biotechnology and medicine.

Details of the 4th Summer School will soon appear at the website www.msbm.org, but we are happy to announce that Alan Marshall will provide a lecture on FT-ICR-MS fundamentals. Beyond this we anticipate the program will be quite similar to past MSBM programs covering MS fundamentals and applications in medicine related to proteins, lipids, and carbohydrates, both from a structural perspective and various -omics approaches to discovery science.

Please feel free to contact us directly at msbm.dubrovnik@gmail.com which will reach the entire organizing committee. We look forward to hearing from you.

All the Best,

MSBM Organizing Committee

Organizing Committee:

J Peter-Katalinić (chair), Münster

Lj Paša-Tolić, Richland

L Bindila, Luxembourg

DR Goodlett, Seattle

GL Corthals, Turku

M Cindric, Zagreb
