JOB OFFER
Date: 26/10/2021

PRINCIPAL INVESTIGATOR: José A. Esteban
SCIENTIFIC PROGRAM: Molecular neuropathology
JOB OFFER: Predoctoral (PhD) contract

PROJECT TITLE:
Interplay between synaptic and metabolic plasticity

PROJECT DESCRIPTION:
The overall goal of this research project is to understand how synaptic function and metabolic regulation are coordinated during synaptic plasticity, and the relevance of this coordination for proper cognitive function. This project will be addressed using a combination of molecular biology, fluorescence microscopy and electrophysiology, using different genetic mouse models.

DURATION:
4 years

REQUIREMENTS, EXPERIENCE AND ACADEMIC QUALIFICATIONS:
Candidates should hold (or be currently studying) Masters in Biomedical, Biochemical or Pharmaceutical disciplines.

CONTACT:
jaesteban@cbm.csic.es

DEADLINE:
5 November

OTHER INFORMATION:
Candidates should send a CV and academic records to jaesteban@cbm.csic.es. Further information about the research group can be found at www.cbm.uam.es/estebanlab.
