JOB OFFER

Date: 05/01/2022

PRINCIPAL INVESTIGATOR: José J. Lucas

JOB OFFER: Seeking candidates to apply for Juan de la Cierva Contract

PROJECT TITLE:
RNA-binding proteins and altered mRNA processing in neural disease

PROJECT DESCRIPTION:
In our laboratory we study transcriptomic alterations in neural diseases such as Huntington's disease or autism, and we characterize in animal models the underlying genes and proteins to enable new therapeutic opportunities. See some recent studies from our lab at:

Elorza et al. 2021 Brain 144:2009-23 PMID: 33725094
Parras et al. 2020 Brain 143:2139-53 PMID: 32594159
Hernández et al. 2020 Brain 143:2207-19 PMID: 32533168
Parras et al. 2018 Nature 560:441-6 PMID: 30111840

DURATION:
2 years with possibility of extension

REQUIREMENTS, EXPERIENCE & ACADEMIC QUALIFICATIONS:
As in the mentioned JdlC call
