

JOB OFFER

Date: 05/09/2022

PRINCIPAL INVESTIGATOR: Emilio Lecona/María Gómez

SCIENTIFIC PROGRAM: Genome Dynamics and Function

JOB OFFER: Project Manager

PROJECT TITLE:

RepliFate Doctoral Network

PROJECT DESCRIPTION:

RepliFate is a Doctoral Network funded by the Marie Skłodowska-Curie Action that aims at training the next generation of scientists in the field of DNA replication, cell identity, cancer and inflammation. We are a consortium of 11 academic labs and an industrial company who will be hosting 12 pre-doctoral researchers. We have designed a transversal program based on creativity, communication and equality as pillars to achieve the scientific and non-scientific training necessary for a career in academia, industry or scientific communication. The network includes companies (UbiQ, InSyBio, Adelis), a communication agency (ScienSeed), and other scientific organizations (PRISMA, AECC, Universidad Internacional de Andalucía) who take part in the training program and other actions of RepliFate. We are looking for a Project Manager that will be in charge of implementing the recruitment process, coordinating the organization of the meetings and training actions of the network, and taking care of the communication with the European Commission, including writing reports and deliverables. The work will be supervised by Emilio Lecona and María Gómez at the CBMSO.

DURATION:

Four years

REQUIREMENTS, EXPERIENCE AND ACADEMIC QUALIFICATIONS:

Candidates should have experience in project management. A degree/PhD in Biochemistry, Biomedicine or related is valued. Experience in scientific writing will be highly valued.

CONTACT:

Emilio Lecona elecona@cbm.csic.es, María Gómez mgomez@cbm.csic.es

DEADLINE:

01/10/2022

OTHER INFORMATION:

Applications including an updated CV should be addressed to Emilio Lecona or María Gómez.
