

JOB OFFER

Date: 04/11/2021

PRINCIPAL INVESTIGATOR: Felipe X. Pimentel Muiños

SCIENTIFIC PROGRAM: Immune system development and function

JOB OFFER: Post-doctoral Investigator

PROJECT TITLE:

Unconventional autophagy in health and disease

PROJECT DESCRIPTION:

The project involves the use high-throughput techniques to find novel molecules able to regulate unconventional autophagy, characterize their function, and establish how their normal activity may be altered in human inflammatory diseases.

DURATION:

2 years

REQUIREMENTS, EXPERIENCE AND ACADEMIC QUALIFICATIONS:

Candidates should hold a PhD in biosciences or be about to defend their PhD thesis. High motivation for laboratory work and biomedical research is a must. Experience in protein binding assays, cell biology techniques and mouse models will be valued.
