JOB OFFER
Date: 19/12/2023

PRINCIPAL INVESTIGATOR: Felipe X. Pimentel Muiños

SCIENTIFIC PROGRAM: Immune system development and function

JOB OFFER: Post-doctoral Investigator (application to the Juan de la Cierva program)

PROJECT TITLE: Unconventional autophagy in health and disease

PROJECT DESCRIPTION:
The project involves the identification of unconventional autophagic processes induced during programmed cell death, and characterization of their possible implications in the control of immunogenic cell death.

DURATION:
2 years funded by the Juan de la Cierva postdoctoral program

REQUIREMENTS, EXPERIENCE AND ACADEMIC QUALIFICATIONS:
Candidates should hold a PhD in biomedical sciences or be about to defend their PhD thesis. High motivation for laboratory work and biomedical research is a must. Experience in molecular and cellular biology techniques and mouse models will be valued.
