

40th CBM Annual Science Meeting - Posters

17 December	18 December
Juan Miguel Redondo Integrative Discovery of Molecular Pathways, Biomarkers of Risk, and Novel Therapeutic Targets in Aortic Disease in Marfan and Loeys-Dietz Syndromes	Marta P. Pereira Human Stem Cells to Build New Neuroscience Paradigms
Ivan Ventoso Translation reprogramming, stress response and proteostasis	Manuel Pazos Bacterial cell envelope during preseptal growth in Gram-negative bacteria
Maria Villa/Javier Santos Use of multi-omic analyses, clinical information and molecular approaches for the identification of genetic biomarkers and therapeutic targets	Begoña Aguado/Jose María Requena Regulation of gene expression in Leishmania
Carlos Perea Preservation and Dynamics of the Transcriptional Machinery across Mitosis	Hisse van Santen HLA Allele-Specific Regulation of CD33 CAR-T Cells by KIR2DL1 to Achieve Leukemia Selectivity in AML immunotherapy
Wifried Meijer Molecular Mechanisms of Gene Regulation in Gram-Positive Conjugative Plasmids	Manuel López Cabrera Transición Mesotelio Mesenquimal: Una diana terapéutica común en adhesiones postquirúrgicas y en metástasis peritoneal.
Carlos Estella/Antonio Baonza Deciphering the Stress Response Code of p53 in Cellular Homeostasis and tumorigenesis	Sara Cogliati Testosterone mediated metabolic remodelling
Petronila Penela GRK2-Tailored Signalling Networks and Microenvironment Remodelling for Cancer and Vascular Disease Progression	David Ruano Biotechnology of probiotics and intestinal pathogens
Eva Porlan Neural Stem Cells in the Adult Brain	Leonardo Beccari Transcriptional regulation of embryonic cortex development
Ricardo Amils Molecular Biology of Extremophiles	Beatriz Cubelos Oligodendrocyte Differentiation Processes: Neuropathological Implications
Esther Serrano Unraveling the sex-specific function of Dmrt5 in the developing midbrain using multi-omics	Jose María Izquierdo Welder distal myopathy: the role of T-cell intracellular antigen 1 (TIA1)
